

When opening this window, The *Model Editor* and the *Parameters Editor* windows become in read-only mode.

State Analysis Synthesis

Left Hand Side

select the states of the model to be displayed

Right Hand Side

For each of the selected states (in column), display the state of each relation and for each actor, display the index whose value is maximal or minimal in this state.

This window is provided to ease comparison between significant states.

Structural analysis

*Display indexes about
each Actor,
each Relation
links between each actor and relation
links between actors' pairs*

Network

Allows to display the structure of the organization as a network.
The layout of the network is lost on quitting this window.

Graph screenshot: generate a .png file of the graph stored in the model directory

Network type: select whether the graph includes only actor nodes or actor and relation nodes

Edges R > A, Edges A > A, Actor nodes, Relation nodes: select the label to be associated to edges and nodes.
